CERTIFICATE

This is to certify that the practical / term work carried out
in the subject of **System Design Practice** and recorded
in this journal is the bonafide work of

Megha Joshi (CE002) (20CEUOS029)
Akash Pambhar (CE005) (20CEUOS025)
Princy Bhalu (CE018)(20CEUOS097)

of B.Tech semester **VI** in the branch of **Computer Engineering**
during the academic year **2022-2023**.

Abstract:

We have built a website which provides a learning platform for educational institutions that aims to simplify creating, distributing, and grading assignments. The primary purpose of this classroom is to streamline the process of sharing files between teachers and students.

Technology And Tools Used:

❖ Technology:

- React js
- MongoDB Atlas
- Express js
- Node js
- React Native
- Redux

❖ Tools:

- Git
- Github
- Postman
- Visual Studio Code
- Cloudinary

Software Requirement Specifications:

Functional Requirements:

R1 Login

Description: Login using userId and password provided by admin. UserId is student unique college Id and password is student birthdate. Also need to write captcha for confirming I'm not a robot. If userId and password are correct then successfully login otherwise give a message that credential does not match.

Input : UserId and password

Output : Dashboard

R2 Admin

R2.1 Manage Teacher :

R2.1.1 Add Teacher :

Description: Fill the teacher details like name ,experience, DOB, email, department.

Input : teacher details

Output : user id and password

R2.1.2 Update details :

Description: Teacher's details can be updated by admin as and when required.

Input : new update details

Output: update dashboard

R2.1.3 Remove teacher :

Description: By clicking the button admin can remove the teacher on the dashboard.

Input : admin selection

Output : dashboard with removed data

R2.1.4 View teacher details :

Description: Admin can view all teacher records.

Input : teacher id

Output : teacher details

R2.2 Manage Student :

R2.2.1 Add Student :

Description: Fill the student details like name , graduation year, department, DOB, email.

Input : student details

Output : user id and password

R2.2.2 Update details :

Description: student`s details can be updated by admin as and when required.

Input : new update details

Output: update dashboard

R2.2.3 Remove student :

Description: By clicking the button admin can remove students on the dashboard.

Input : admin selection

Output : dashboard with removed data

R2.2.4 View student details

Description: Admin can view student records.

Input : student id

Output : student details

R3 Teacher

Description : Teacher can create and manage classes, assignments, material.

R3.1 Manage Class :

R3.1.1 Create Class :

Description : Teacher can create classes. For creating class teachers have to specify class name, subject name, batch year, department.

Input : Class details

Output : Classroom created.

R3.1.2 Delete Class :

Description : Teacher selects class for delete.

Input : Teacher selection

Output : Updated dashboard

R3.2 Manage Material

R3.2.1 Upload material

Description : Teacher can upload assignment and material. For creating assignments teachers have to specify topic, description, attachment, points and due date. Add material such as YouTube videos, a Google Forms survey and other items from google drive.

Input : material details

Output : updated classroom

R3.2.2 Edit material

Description : teachers can update data of material and when required.

Input : new details of material

Output : updated material details

R3.2.3 Delete material

Description : Teacher can delete assignment and material.

Input : material id

Output : updated classroom

R4 Student

R4.1 Join Classroom :

Description: Students can join class using classroom code which is provided by teacher

Input : classroom code

Output : class joined successfully.

R4.2 Leave Classroom :

Description : Students can leave class.

Input : student selection

Output : Updated dashboard

R4.3 View Material :

Description: Students can view all assignments and material uploaded by teachers.

R4.4 Submit Work :

Description: Students can submit their assignment. If they submit within the due date, a successful message is displayed and otherwise a late submitted message will be displayed.

Input: Add Assignment

Output : Appropriate message based on due date.

R4.5 View classmates And teacher

Description: Students can view their classmates and teachers.

Input : student selection

Output : view their classroom and teachers

Data Dictionary:

Users:

Field	Datatype	Constains

Marked By: Shukan Dobariya

Marked On: 29/3/2023

Marked Points: 100

Marked Status: Pending

21

Conclusion:

- User registration and management done by admin.
- Professor can manage material and assignments.
- Students can view material and assignments.
- Students can submit respective assignments.
- Professor can view all submitted assignments and according to that give marks to students.

Limitation And Future Extensions Of System:

Limitation:

- Modulation of classes is not there.
- Professor can not remove students.

Future Extensions:

- Doubt solving panel will be added.
- Send notification mail to students one day before the due date.
- Modulation of the classroom according to semester.
- Professor can remove student from the classroom.
